1130 Bluffs Pkwy, Canton, GA 30114
Ph: 678-493-6000 | Fax: 678-493-6035

ADDENDUM # 2

Solicitation Number: 2024-024
Solicitation Name: Justice Center Panic / Duress System
Addendum Release Date: April 19, 2024

Proposers acknowledge the receipt of this Addendum by inserting the number and date in the appropriate position on the Proposal Form. Failure to do so may subject the Proposer to disqualification. This Addendum is a part of the Contract Documents. It modifies them as follows:

1. **Question:** Would you please clarify what is meant by "user seats." Is this referring to virtual buttons or something else?

Answer: In software licensing, a "user seat" refers to a single user's access to a specific software application. It essentially represents the permission for one individual to utilize the software functionalities. Some licenses may be concurrent, allowing a certain number of users to access the software simultaneously, regardless of individual identities. On the other hand, named user licenses grant access to specific individuals. Software with user seat licensing often has features for user management, allowing control over who can access the software and their permission levels. Please include licensing information for your systems and software in your quote.

2. **Question:** Would it be possible to make an appointment to demonstrate our system to you on April 23rd (after 10am), 24th, or 25th? It should take around 30 minutes. We have systems in many county courthouses around Georgia.

Answer: Section 16 of the Standard Solicitation Terms and Conditions specifies that the County may reach out to one or more vendors for an oral and/or product demonstration to clarify their proposal or to further define the offer. This would only be requested after the County had received the proposals and determined that additional information was needed.

3. **Question:** Can you please provide more information for what type of radios are being used? (APX, SL, CP, XPR)

Answer: Currently the Cherokee Sheriff's Office utilizes the Motorola APX 6000Li portable radios which are assigned to each officer. We have a main "base" radio in our control room. It is a Motorola, Model # HLN6042A. This could be compared to the radio used in a patrol vehicle, but is mounted in the control room.

4. **Question:** It looks like this RFP has pre-set slots for vendors to upload documents, but there are no slots for me to upload my bonding documents if my bid is >\$100k, my proof of insurance, my proposal, the warranty info, or the other documents mentioned in the evaluation criteria and scope of work. How do I upload these too?

Answer: We are unable to add document upload slots now that the RFP has already been published in Bidnet, so you should include the other documents we requested in the same PDF as one of the other documents we did request and provide a slot for.

****END****
